AIMS OF THE WORKSHOP

The Nanoscience in Cancer Immunotherapy Workshop (NCIW), to be held in Turin from March 11-13 2020, is an international meeting jointly organized by the Università and Politecnico of Turin with the aim to provide a platform for discussion on the most recent advances in tumor immunology with a focus on nano bio-technology as a strategy to foster the impact of immunotherapy on cancer treatment.

The main goal of the NCIW is to provide a challenging transdisciplinary environment where life and nano scientists can exchange their knowledge and latest findings in order to accelerate and improve the coordinated progress of oncology, drug development and delivery. The program covers topics from basic research in tumor immunology to the latest advancements in the design of complex tissue models and of nanotechnology based delivery systems in cancer immunotherapy.
